SCAN TO PLAY

1 Lead

Play a single, a set of 2–3 or a run of 2–3 from tiles side by side in your cart.

2 Follow

Beat it with the same kind and size at an equal or higher number, or play a Chef's Special.

3 Pass

Drop out of the trick, then swap an end tile of your cart for one of your team's trolley tiles.

THE GAME

A partnership climbing game where you can only help your partner through the face-up tiles you share. Your hand, your cart, stays in a fixed order you can't rearrange. Each player also puts one tile face up on their team's trolley, and only your team can swap with it. When every cart on one team is empty, the round ends and the other team takes penalty points.

WHY IT STANDS OUT

- **No table talk.** You never talk strategy. The trolley is your only way to help your partner, and the other team can see it too.
- **Passing fixes your cart.** When you pass, you can trade an end tile of your cart for a trolley tile, putting out something your partner might need.
- **Tiles or cards.** The same rules with tiles or cards.
